PhD candidate in philosophy (Sorbonne Université / ISIR–CNRS). Expected defense : July 2026. Research at the intersection of ethics, social robotics, and healthcare technologies.

Education

PhD in Philosophy *2022 – 2026*

Sorbonne Université, Paris, France

Thesis : *Ethical Issues in the Use of Social Robots in Healthcare.*
Supervisors : Anouk Barberousse, Mohamed Chetouani.
Affiliations : Sciences, Normes, Democracy (SND) ; Institute of Intelligent Systems and Robotics (ISIR–CNRS) ; Sorbonne Center for Artificial Intelligence (SCAI).

Master's Degree in Philosophy, Biomedical Humanities *2020 – 2022*

Sorbonne Université, Paris, France

Dissertation : *Ethical Issues Related to the Use of Artificial Intelligence in Assisting People with Alzheimer's Disease : The PARO Robot.*

Bachelor's Degree in Philosophy and Biology (Dual Program) *2016 – 2020*

Sorbonne Université, Paris, France

Interdisciplinary training in life sciences (genetics, molecular biology, neurophysiology) and philosophy (ethics, philosophy of science, metaphysics).

Research Experience

Research Engineer *2026 – present*

ISIR (CNRS) — Sorbonne Université, Paris, France

— Member of the ACIDE team (*Action, Cognition, Interaction and Decision Embodied*) on INNOVCARE, an interdisciplinary project on care-led innovation for elderly autonomy.

PhD Researcher *2022 – 2026*

SND / ISIR–CNRS / SCAI — Sorbonne Université, Paris, France

— Doctoral research on ethical issues in social robotics for healthcare : qualitative fieldwork (semi-structured interviews), ethical analysis, and technology assessment.
— Collaboration with robotics engineers and healthcare professionals on human–robot interaction (HRI) in care settings.
— Contributor to interdisciplinary projects including INNOVCARE (France 2030 / ANR, France–Japan) and TAPAS (Franco-Japanese collaboration).

Research Intern, PIRoS Team *2021 – 2022*

ISIR (CNRS) — Sorbonne Université, Paris, France

Perception, Interaction, and Social Robotics. Supervisors : Raja Chatila, Mohamed Chetouani.

Teaching Experience

Course Author and Lecturer *2022 – 2023*

Faculty of Arts and Humanities, Sorbonne Université

— Designed and taught *Introduction to the Philosophy of AI* for first- and second-year undergraduates (∼35 students) : original syllabus, lectures, and assessments.
— Supervised one guided research project (analysis of the Replika app).

Teaching Assistant *2022 – 2023*

Faculty of Arts and Humanities, Sorbonne Université

— Taught Ethics and General Philosophy (∼35 students per course).
— Supervised three guided research projects (Schrödinger's Cat ; Kuhn's *Structure of Scientific Revolutions* ; On Truth).

Conferences, Seminars, and Presentations

International conferences and invited talks

— Speaker, "Ethical Perspectives on Natural Autonomy and Artificial Autonomy," Robophilosophy 2024, Aarhus, Denmark, August 22, 2024.
— Speaker, "Building Trust in Human–Machine Interaction : Ethical Challenges," HHAI 2025, MUL-

TITTRUST 4.0 workshop, Pisa, Italy, June 9, 2025.

— Speaker, Doctoral seminar, IHM 2024, Paris, France, March 25, 2024.
— Speaker, OFFRES network seminar, Poitiers, France, July 4, 2024.

Panels and institutional events

— Panelist, Ethics of Robotics and AI Conference (CERIA), with Serge Tisseron and Aurore Kiesler, Paris, December 1, 2023.
— Panelist, "Ethics and AI," ISIR, with Daniel Andler and Mohamed Chetouani, Paris, June 22, 2023.
— Panelist, "Ethics," GRH seminar "Combining New Technologies and Human Relations," IRCOM, Angers, February 16, 2024.
— Speaker, 3rd Annual INNOVCARE Forum, EHESS, Paris, November 15, 2023.

Research seminars and outreach

— Research presentation, Hôpital Broca, Paris, March 28, 2023.
— Research presentation, TAPAS project meeting, ISIR, Paris, September 4, 2023.
— Speaker, "Applying Philosophy of Science and Technology," Sorbonne Université, March 29, 2024.
— Research presentation, SND doctoral students' day, Paris, June 25, 2024.
— Speaker, Science Festival, Faculty of Science and Engineering, Sorbonne Université, October 11, 2024.

Academic Service

— **Program Committee Member**, 5th International Conference Series on Hybrid Human–Artificial Intelligence (**HHAI 2026**).

Skills

Languages — French (native), English (native), Arabic (intermediate), Spanish (basic).

Research — Qualitative methods (semi-structured interviews, thematic analysis) ; ethical analysis and technology assessment ; interdisciplinary literature review (philosophy, robotics, AI, medicine, sociology, psychology).

Tools — LaTeX, Overleaf, Zotero ; HAL, PhilPapers, Google Scholar, Cairn, JSTOR.

Communication — Academic writing and public speaking in French and English ; science outreach to diverse audiences ; open-access dissemination (HAL).
