Meriem Beghili

PhD candidate in AI ethics · Sorbonne Université / ISIR–CNRS · Paris, France

meriem.beghili@sorbonne-universite.fr · meriem.beghili@gmail.com · ORCID: 0009-0009-8560-560X · linkedin.com/in/meriem-beghili-726046259 · meriembeghili.github.io

PROFILE

PhD candidate in AI ethics (defense December 2026) working on the ethical issues raised by the use of social robots in healthcare. I designed a reusable ethical-risk assessment framework for AI systems and robots deployed in care settings, built on qualitative fieldwork with clinicians, caregivers, and roboticists. Experienced in cross-disciplinary coordination on funded international projects; six peer-reviewed publications; talks in three countries; programme committee member, HHAI 2026. Interests extend to AI governance and AI Act compliance. Working fluently with AI-augmented development tools (Cursor, Hermes, GitHub, agentic automation).

EDUCATION

PhD in AI ethics — Ethical Issues in the Use of Social Robots in Healthcare

2022 – 2026 (defense December 2026) · Sorbonne Université, Paris

Supervisors: Anouk Barberousse, Mohamed Chetouani. Affiliations: Sciences, Norms, Democracy (SND); Institute of Intelligent Systems and Robotics (ISIR – CNRS); Sorbonne Center for Artificial Intelligence (SCAI).

Master's Degree in Philosophy, Biomedical Humanities

2020 – 2022 · Sorbonne Université, Paris

Dissertation: Ethical Issues Related to the Use of Artificial Intelligence in Assisting People with Alzheimer's Disease: The PARO Robot.

Bachelor's Degree in Philosophy and Biology (Dual Program)

2016 – 2020 · Sorbonne Université, Paris

Interdisciplinary training in life sciences (genetics, molecular biology, neurophysiology) and philosophy (ethics, philosophy of science, metaphysics).

RESEARCH EXPERIENCE

Research Engineer — INNOVCARE

2026 · ISIR (CNRS) — Sorbonne Université, Paris

France 2030 / ANR project on care-led innovation for elderly autonomy, inside a Franco-Japanese consortium. Interface between humanities research and robotics engineering teams, in a deliverable-driven setting. Member of the ACIDE team (Action, Cognition, Interaction and Decision Embodied).

PhD Researcher

2022 – 2026 · SND / ISIR–CNRS / SCAI — Sorbonne Université

Designed and led the development of a reusable ethical-risk assessment framework for AI systems and robots in healthcare, applied to systems in use and to prospective cases (PARO, MediXpert). Qualitative fieldwork in care settings (semi-structured interviews, thematic analysis), identifying use risks designers had not anticipated. Cross-cutting work with roboticists, clinicians, and partners on INNOVCARE and TAPAS (Franco-Japanese collaboration).

Research Intern, PIRoS Team

2021 – 2022 · ISIR (CNRS) — Sorbonne Université

Perception, Interaction, and Social Robotics. Supervisors: Raja Chatila, Mohamed Chetouani.

TEACHING EXPERIENCE

Course Author and Lecturer — Introduction to the Philosophy of AI

2022 – 2023 · Faculty of Arts and Humanities, Sorbonne Université

Original syllabus, lectures, and assessments for first- and second-year undergraduates (~35 students). Supervised one guided research project (analysis of the Replika app).

Teaching Assistant — Ethics and General Philosophy

2022 – 2023 · Faculty of Arts and Humanities, Sorbonne Université

~35 students per course. Supervised three guided research projects (Schrödinger's Cat; Kuhn's Structure of Scientific Revolutions; On Truth).

TALKS, PANELS & OUTREACH

— “Building Trust in Human–Machine Interaction: Ethical Challenges”, HHAI 2025, MULTITRUST 4.0 workshop, Pisa, June 2025.
— “Ethical Perspectives on Natural Autonomy and Artificial Autonomy”, Robophilosophy 2024, Aarhus, August 2024.
— Panelist, Ethics of Robotics and AI Conference (CERIA), with Serge Tisseron and Aurore Kiesler, Paris, December 2023.
— Panelist, “Ethics and AI”, ISIR, with Daniel Andler and Mohamed Chetouani, Paris, June 2023.
— Doctoral seminar, IHM 2024, Paris (March 2024); OFFRES network seminar, Poitiers (July 2024); GRH seminar, IRCOM, Angers (February 2024).
— 3rd Annual INNOVCARE Forum, EHESS, Paris, November 2023.
— Research presentations: Hôpital Broca (2023); TAPAS project meeting, ISIR (2023); SND doctoral students' day (2024).
— “Applying Philosophy of Science and Technology”, Sorbonne Université, March 2024.
— Science Festival, Faculty of Science and Engineering, Sorbonne Université, October 2024.

ACADEMIC SERVICE

— Programme Committee Member, 5th International Conference on Hybrid Human–Artificial Intelligence (HHAI 2026).

SKILLS

AI-augmented development

AI-assisted coding and workflows (Cursor, Hermes); GitHub (version control, collaboration, automation); prompt engineering; designing and running agentic task automation pipelines.

AI ethics & governance

Ethical risk assessment; AI Act compliance; responsible design of AI systems and social robots; technology assessment.

Research methods

Qualitative methods (semi-structured interviews, thematic analysis); interdisciplinary literature review (philosophy, robotics, AI, medicine, sociology, psychology).

Tools

LaTeX, Overleaf, Zotero; HAL, PhilPapers, Google Scholar, Cairn, JSTOR.

Languages

French (native), English (native), Arabic (intermediate), Spanish (basic).

Communication

Academic writing and public speaking in French and English; science outreach to diverse audiences; open-access dissemination (HAL).
